What? There needs to be submissions on this topic to warrant further action/protection against people that injure those that want to protect & keep safe public officers from harm?

Isn't that an inalienable right for these people?

As adults (past the age of 15-16) we know what is right & wrong, what is morally & ethically the right thing to do towards our fellow human beings.

We ALL know about being RESPONSIBLE for our own actions.

C'mon. This is a no-brainer. A policeman in every ambulance I'll help pay for!
